

WE GET YOU NEED TO EMPOWER YOUR IT PROCESSES AND REDUCE COSTS.

CDW Amplified™ OS and Apps
Maturity Assessment and Roadmap

Are your IT processes plagued by inefficiencies? Are business customers asking for things you can't provide or easily manage? Are you unsure if you could improve or replace your current ITSM tool to reduce cost and improve efficiency? If you answered "yes" to any of these questions, our Maturity Assessment will help guide you toward the next level of process maturity.

CDW's Maturity Assessment and Roadmap can help you achieve:

-  Increased Performance
-  Faster Innovation
-  Operational Efficiencies

Orchestrating the Right Solution

Ensure the ongoing maturity and adoption of your ServiceNow instance with our specialized Maturity Assessment. This assessment builds a "just-in-time" path, from current state to a recommended future state, outlining the best-fit journey for you. This is an Advisory Services-led engagement that infuses a best-practice view of the future, incorporates a business-led approach and then designs a custom plan for ongoing ITSM and toolset maturity.

Benefits You Will Receive:

- Implementation roadmap outlining a recommended path for service management maturity that aligns with overall business goals and objectives.
- Opportunity analysis identifying both short-term wins and longer-term areas for improvement.
- Holistic approach with recommendations for maturity that include organizational readiness and cultural adoption, process maturity and toolset adoption and enhancements.
- Process maturity review (for new process areas) and recommendations for improvement as aligned with business goals and organizational benefit.
- Creation of a multi-phase maturity action plan that includes identification of assumptions and dependencies, as well as a definition the benefits, estimated timeline, scope and cost of short-term opportunities.
