

WE GET BUILDING A COMPLETE IT SERVICE TAXONOMY ISN'T ALWAYS CRYSTAL CLEAR.

CDW Amplified™ OS and Apps Service Taxonomy Workshop

Documenting your Service Taxonomy allows you to identify the services offered and any overlaps between them. This becomes especially important when your ServiceNow catalog includes multiple services. As an example, services like training may be offered by several departments. Identifying and mapping these services out allow you to make better decisions regarding how to display them in your catalog.

CDW's Service Taxonomy Workshop can help you achieve:

-  Operational Efficiencies
-  Increased Performance
-  Faster Innovation

Orchestrating the Right Solution

This three-day interactive journey will guide participants through the process of aligning IT service delivery with business needs and priorities. They will gain greater awareness of how business services impact IT operations from a macro perspective. In the end, we help them build a useable service taxonomy model based on their specific services, and help them become self-sufficient in maintaining and maturing that business service taxonomy and CMDB.

Our Advisory Service consultants help you define and document your organization's services and provide your team with the experience to easily handle continued updates and enhancements.

Workshop Benefits:

- Provide knowledge transfer on how to identify and define your services.
- Align your services to match your business needs.
- Help you design a fully tailored business services taxonomy.
- Provide your delivery team with a complete business services guide.

CDW GETS SERVICENOW
