

WE GET DATA REDACTION AND DATA SECURITY IS A REQUIREMENT, NOT A NICE TO HAVE.

CDW Amplified™ OS and Apps
SmartPDC Application

Increasing regulations and audits make data loss prevention critical. But when staff and job roles are constantly shifting, how do you ensure data policy compliance? Our PDC Application creates a step-by-step process within ServiceNow to redact data that must be private.

CDW's SmartPDC Application can help you achieve:

- Reduced Risk
- Increased Performance
- Reliability

Orchestrating the Right Solution

SmartPDC takes data redaction to an entirely new level, giving you more control over who sees what than ever before. You can set privacy rules, get custom notifications, request or grant access to secured records and more. Administrators can assign review and release groups, securing the access and release of sensitive records. They can also receive custom notifications for access requests.

SmartPDC creates a step-by-step process within ServiceNow that is dynamic and robust, yet easy to maintain, helping you ensure data compliance at every level.

Benefits You Will Receive:

- Set privacy rules for any record.
- Ensure governance of access and release of sensitive records.
- Redact specific keywords and phrases.
- Redact general patterns (e.g., SSN, phone numbers, employee IDs).
- Hide specific types of attachments.
