

SOLUTIONS FOR THE ALWAYS-ON ENTERPRISE.

ORCHESTRATED BY CDW.

WHY CDW?

CDW is uniquely qualified to design IT solutions that remove complexity and unnecessary costs from your organization. Our experts become part of your team providing the support you need, when and where you need it.

We can help you navigate Microsoft's robust array of solution offerings, including Microsoft Azure Storage. CDW provides cloud applications, solutions and services in public, private and hybrid cloud environments. Based on your business demands, we can help you plan, deliver and manage a flexible cloud solution tailored to your needs. We offer best-of-breed providers, risk mitigation strategies and dedicated, personalized expertise to deliver economic and operational benefits.

We get Microsoft Azure. And we can share our knowledge with you, so your organization can spend less time managing software and more time putting it to work.

TAKE CONTROL OF YOUR STORAGE NEEDS EASILY AND EFFICIENTLY

As your enterprise accelerates the adoption of a multicloud strategy, we know the need to access any application and any data, across any cloud infrastructure, is more important than ever. Backing up your data and ensuring you have a copy saved offsite and in the cloud has also become essential to minimizing risk for your organization. Veeam for Microsoft Cloud, with services provided by CDW, provides a seamless solution to lower costs by archiving data to Microsoft Azure, mitigate risk by backing up Microsoft Office 365 and ensure availability of cloud-based workloads with the protection of Azure Virtual Machines. This tightly integrated solution for enterprises of all sizes eliminates the complexity and simplifies business continuity between your data centre and the cloud.

THE PEOPLE, THE PRODUCTS, THE PLAN

By partnering with CDW, you will receive the expertise of our knowledgeable account managers, certified technology specialists and experienced delivery engineers. To help enable your always-on solution, CDW technicians will complete proof of concept testing to understand your environment and recommend next steps to enable a seamless, integrated Veeam & Microsoft Azure solution.

CDW's expertly trained backup and cloud technicians will help you by delivering connectivity to Azure, so backups can be automated. This would include all implementation requirements, such as creating a VPN, Virtual Machine and storage container within Azure.

CDW would also assist in backing up your Virtual Machine on premise, so it can be easily recovered in Azure. Backup copies would be available to you at all times.

THE BENEFITS

- Low cost – save more than 50 percent compared to tape archives
- Automatically backing up data across on-premises and cloud
- High availability
- Azure integration
- Data encryption in flight and at rest
- Improved disaster recovery and compliance
