

MICROSOFT 365 SECURITY INFORMATION PROTECTION

Security

SECURE YOUR ORGANIZATION WITH AN INFORMATION PROTECTION SOLUTION

Information is one of your most valuable assets and can easily be shared, even outside the organization. Protecting and managing access to this information is vital to your organization to retain the trust and confidence of your customers. Microsoft 365 has a variety of tools to help protect and manage this information. The information protection engagement will provide the best practices on how to configure the products to achieve your goals. This will provide a functional roadmap to ensure security and compliance is built into the Office 365, Windows 10 and EMS solution.

Some of the products and tools covered in our information protection service include:

- Current security controls
- Azure Sentinel
- Cloud App Security
- Azure Information Protection (AIP)
- Data loss prevention (DLP)
- Information security

FEATURES

CDW will help you with a Microsoft 365 information protection pilot to be able to successfully deploy a complete solution, which includes:

- Evaluation of current environment and security requirements
- Deep dive into Microsoft 365 and features that can improve security of documents
- Planning and designing an information protection solution to support a production-ready deployment
- Gathering business and technical requirements to ensure a successful project
- Installation and configuration of Azure Information Protection, data loss prevention, Cloud App Security and more if needed
- Knowledge transfer on proper administration and configuration of information protection components
- Utilization of tools to provide more proactive monitoring and response to security incidents
- Development of roadmap plan on adoption of security features of Microsoft 365

BENEFITS

- Gain a better understanding of the threats and risks for information protection
- Adopt information protection features within Microsoft 365
- Implement controls to protect information within documents and email
- Drive adoption of information protection among your users
- Integration of multiple pieces to work seamlessly together
- Knowledge transfer on best practices to deploy and administer AIP, DLP and Active Directory (AD)
- Utilize features to maximize the benefits of Microsoft 365

WHO ARE WE?

With more than 900 coworkers in offices across the country, CDW Canada helps customers achieve their goals by delivering integrated technology solutions and services that include security, cloud, data centre, networking, collaboration and digital transformation.

WHY CDW?

- CDW is uniquely qualified to design IT solutions that remove complexity and unnecessary costs from your organization. Our experts become part of your team providing the support you need, when and where you need it.
- We can help you navigate Microsoft's robust array of solution offerings.
- CDW is an end-to-end provider of cloud applications, solutions and services in public, private and hybrid cloud environments. Based on your business demands, we can help you plan, deliver and manage a flexible cloud solution tailored to your needs. We offer best-of-breed providers, risk mitigation strategies and dedicated, personalized expertise to deliver economic and operational benefits.
- We get Microsoft, and we can share our knowledge with you so your organization can spend less time managing software and more time putting it to work.
