

MANAGED SIEM

Security

MANAGED SECURITY INFORMATION AND EVENT MANAGEMENT

Managed SIEM provides organizations an enterprise-wide view of security across their environment. A SIEM solution correlates security log data from all your devices within your organization, providing a single pane of glass view into your security ecosystem. This service focuses on identifying security threats to your organization and managing your risk.

FEATURES

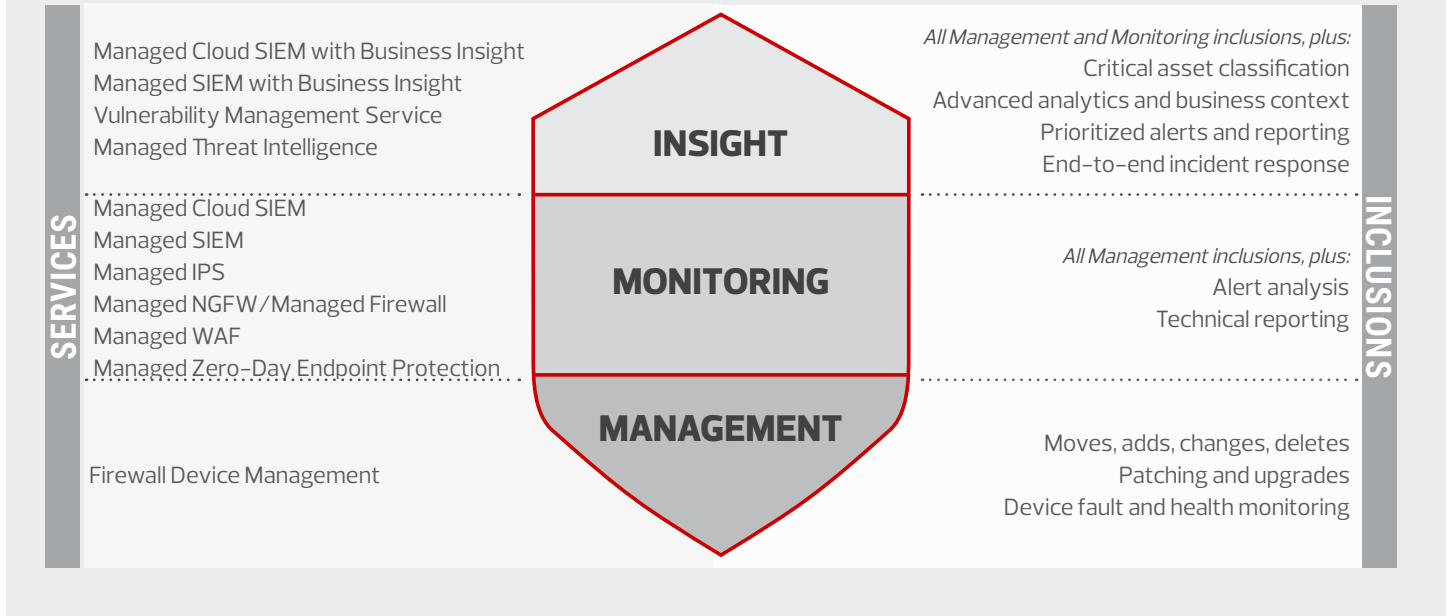

- Analytics focused on identifying suspicious and malicious behaviour
- Security alert monitoring and notification
- Monthly technical security reporting
- Summary report of all security-related incidents
- Ongoing security policy tuning and recommendations to ensure effective security
- Supports multiple SIEM vendor solutions
- 24x7x365 service from highly skilled and experienced staff in our Advanced Security Operations Centre, a 3,000 square foot secured facility

BENEFITS

- Provides an enterprise-wide view of security across your environment, giving our security analysts the visibility and control required to quickly and effectively identify security threats to your organization
- Leveraging our highly skilled and specialized security analysts allows you to reduce the impact of costly security staff recruitment and training, and to refocus your internal staff on more strategic core business functions
- As your environment changes, you will receive continuous improvement through the development and integration of additional security use cases that enhance security detection
- Manage risk through ongoing security false positive tuning and consultation

CDW MANAGED SECURITY SERVICES PORTFOLIO

Our portfolio of services is split into three tiers: Management, for straightforward device management and maintenance; Monitoring, for security alert monitoring and notification; and Insight, our top tier of services, for clients who require more advanced security analytics, response and incident management with business insight. Managed SIEM is part of our Monitoring tier.

WHY CDW?
