Complicated regulations, strict compliance requirements and ever-evolving cyberthreats are creating significant risk for banks, credit unions, capital markets and insurance firms. Plus, as IT initiatives in areas such as cloud and mobility grow, so does the threat landscape. Strategically managing this risk requires the right security software and applications to keep IT systems and information secure, safeguard customers' personal data, adhere to regulations and keep costs down.

**REGULATORY COMPLIANCE AND RISK MANAGEMENT: OUR APPROACH**

Your reputation depends on having the most effective technology to protect customers and your organization, as well as meet demanding regulations. CDW has the expertise and the most advanced technology to help you orchestrate a defense-in-depth strategy to solve some of your greatest security and compliance challenges in a cost-effective way.

**NETWORK VISIBILITY AND ADVANCED ENDPOINT PROTECTION** protects by using the intelligence of network endpoints:
- Advance visibility, analytics and protection
- View activity across the entire network and data center

**CONTENT SECURITY** helps keep phishing and malware from infecting the entire system:
- Protect employees from phishing attacks
- Sandbox suspicious items
- Protect against malvertisements

**NEXT-GENERATION FIREWALL AND IPS** provides strong threat detection to protect users and the network:
- Designed to leverage the cloud
- Early warning and notification systems
- Enable sophisticated sandboxing techniques

**NETWORK SECURITY** connects the organization's security across devices and platforms:
- Create a flexible, scalable environment
- Improve productivity and efficiency
- Secure network access and verify identities

**CLOUD SECURITY** secures data storage via public, private or hybrid cloud solutions:
- Cost-effective and scalable
- Solutions include Infrastructure as a Service (IaaS), Disaster Recovery as a Service (DRaaS), Desktop as a Service (DaaS), Collaboration as a Service (CaaS) and Security as a Service (SECaaS)
CONSIDERATIONS WHEN FORTIFYING YOUR COMPLIANCE AND RISK MANAGEMENT IT

- Are your systems updated with the mandated security IT solutions?
- When was the last time you had your network tested for vulnerabilities?
- Is your data management system flexible, scalable and secure enough to protect and manage the ever-growing quantities of customer and business data?
- Are you using analytics to gain network and endpoint visibility?
- Does your security budget focus merely on complying with regulation, rather than improving your security and risk posture?

REGULATORY COMPLIANCE AND RISK MANAGEMENT. ORCHESTRATED BY CDW.

CDW Financial Services experts, along with our top technology partners, can help you orchestrate a solution that will secure your organization, meet regulatory compliance demands and protect your reputation in a cost-effective way.

PROFESSIONAL SERVICES
from assessment, planning and design makes sure your IT infrastructure is secure and compliant.

MANAGED SERVICES
lets CDW take responsibility for tasks like monitoring, upgrades, maintenance, reporting and security infrastructure management.

THREAT CHECK
is CDW’s free malware detection scan that accesses your network's vulnerability and most critical risks.
