Cisco Collaboration Flex Plan

Simplify your transition to cloud collaboration services

Today’s office is diverse and fast-paced, and isn’t constrained by geography. However, it’s still as important as ever for employees to connect and collaborate. Whether they wish to work with others inside or outside their organization one on one, keep in touch using messaging, brainstorm in meetings, or provide the best possible level of customer service, being able to connect and work together effectively is critical. You need to be able to provide the technology and communications tools that make this possible.

And you need to be able to deliver collaboration services cost-effectively, using on-premises infrastructure or cloud-based services, depending on the needs of your employees.

It helps with transitions to the cloud, and investment protection, by including cloud, premises, hosted and hybrid deployments, with the flexibility to use them all.
