

## Metallic™ Backup & Recovery

Metallic enterprise-grade data protection is fast, flexible, and powerful with the simplicity of SaaS. Proven technology from Commvault and built-in best practices mean you'll get secure backups and speedy, granular restore to protect you against data loss. With Metallic, you'll also get flexibility — from pricing to storage options — in a solution that truly scales.

Whether you're protecting 1 terabyte of data, or 1,000+, you've got the power to grow with Metallic.

### Three offerings to meet your needs

#### Metallic™ Core Backup & Recovery

A strong foundation requires the fundamentals—from VMs to file servers and SQL databases.

#### Metallic™ Office 365 Backup & Recovery

Protect your work in Microsoft Office 365 to safeguard against accidental deletion and corruption.

#### Metallic™ Endpoint Backup & Recovery

Fast and secure endpoint protection for desktops and laptops—with automated backups and flexible, granular restore.

### How we are different

**Multi-petabyte scalability** on a flexible SaaS architecture.

**Superior customer experience.** Robust, yet stunningly straightforward backup and recovery capabilities that span on-premises, multi-cloud, and hybrid environments.

**Storage flexibility.** You can use our infrastructure, or your on-premises or cloud storage.

**Security and reliability.** Get the benefit of 20 years of our experience with customers.

**Enterprise-level granularity.** Select only what you need to recover, directly to the target, for fast and successful data recovery.

**Setup wizard** simplifies setup and expedites speed to first backup, with best practices baked in.

### Why go SaaS?

**SaaS means no-hassle deployment, hands-off maintenance, with no big upfront investment.**
