

Why Metallic™ data protection?

Three reasons to choose a no-compromise solution.

1. Enterprise-grade power;

Because it's built on Commvault's industry-leading technology, Metallic™ data protection offers the scale, security, speed and innovation that companies have trusted for decades. Our best practices that make it easy to safeguard your data.

2. With the ease of SaaS;

Choosing Metallic SaaS means you're up and running in 15 minutes or less. Try before you buy, enjoy simple subscription pricing with no capex investment, and let us handle the upgrades. Easy.

3. Delivering the power to grow.

Choose proven scale and flexibility so you won't be left looking for a new solution as your users, data, and environments grow and change.

Companies today protect petabytes of data on our technology, and our unique SaaS plus option gives you flexibility for fastest recovery that the others don't.

Offerings

Metallic™ Core Backup & Recovery

Making sure your most critical workloads are covered: Virtual machines (VMs), file servers, Microsoft SQL including Windows Server 2008 & SQL 2008.

Metallic™ Office 365 Backup & Recovery

Covering your extensive use of Microsoft Office including Exchange, SharePoint, Teams, and OneDrive.

Metallic™ Endpoint Backup & Recovery

Covering your desktops and laptops, wherever your data lives and goes.

Don't take our word for it ...

"Metallic, built on a Commvault foundation, provides complete coverage, robust features, and unprecedented flexibility while still delivering on the BaaS promise of smoother operations and more predictable costs"

– George Crump, *Founder and Lead Analyst, Storage Switzerland*

"Metallic is very easy to use. Configuring data protection for physical and virtual servers both on-premises and in the cloud is super simple and anyone will find the interface easy to understand. SaaS solutions can definitely reduce manual effort, and since it's based on Commvault, users can be confident that backups will continue to perform ... it's a solution for the long term."

– Chris Shearer, *AP Mortgage.*
