

Expand what's possible on Chromebooks

apps and **STEM** tools

Google for Education

Whether learning to code or recording podcasts, creating video documentaries or making animated stories, students use Chromebooks to gain skills of the future.

Explore the many learning tools on Chromebooks, including our collection of educator favorites from Google for Education and **CDW-G**.

Active listening apps

Reflect on reading and elevate listening comprehension skills.

Creative apps

Make videos, produce podcasts, and visually animate thinking.

STEM tools

Design and code real-world inventions.
