Indoor air quality matters

So does your choice of toner cartridge

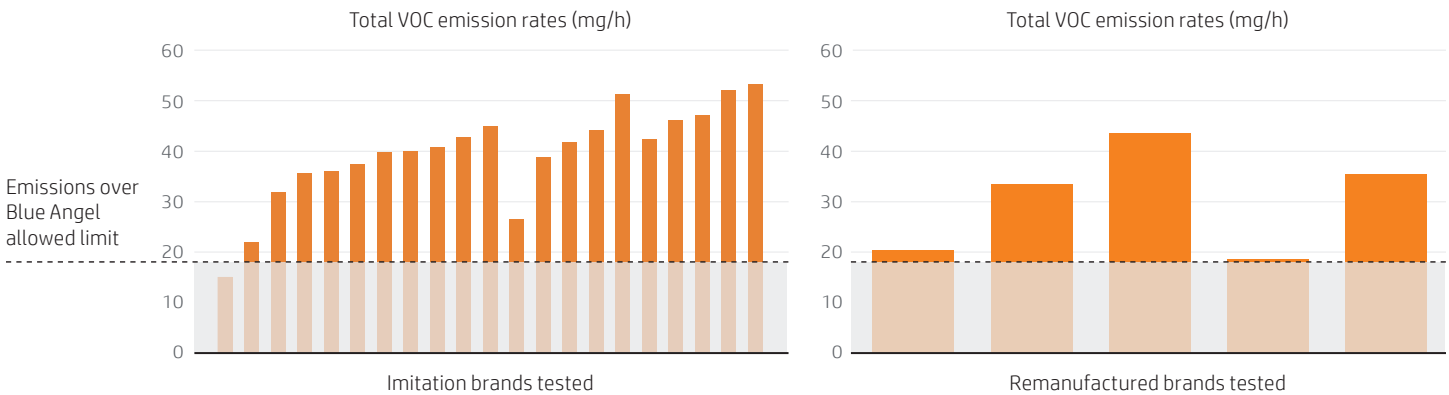

Bad for your indoor air quality¹ and your health²

Cheap alternative cartridges may fit your HP printer, but they may not have the investment in engineering that helps protect your indoor air quality. If your toner cartridge doesn't meet eco-label standards, it may be releasing emissions over the allowed limits.¹ Those emissions could expose you, your employees, and your customers to potentially harmful levels of volatile organic compounds (VOCs).²

96% of non-HP toner cartridges tested failed EPEAT® indoor air quality tests¹

Non-HP toner cartridges tested emitted up to **191%** over the allowed limit of total VOCs¹

Your printer may no longer meet EPEAT qualifications if you use a non-HP cartridge.¹

Original HP toner cartridges can help you feel confident your HP printing system³ will perform within EPEAT emission guidelines.
