

MANAGED MOBILITY IN THE CLOUD FOR ANY DEVICE

PRODUCTIVITY FOR BOTH USERS AND IT TEAMS

A comprehensive mobility solution in the cloud

Your end users need mobile devices and apps to access information and do their jobs effectively. IT needs to keep organizational data secure. Managing mobile productivity is a balancing act. And with the right cloud solutions from CDW, both end users and IT can be more productive. IT stays in control of where and how organizational data is used, and users get the exceptional experience they desire.

Enterprises are expected to spend

34%

of their total budgets on cloud computing and hosted services in 2017.¹

INTEGRATED SOLUTION, MAXIMUM BENEFIT

Go beyond traditional mobile device management

Microsoft's Enterprise Mobility + Security (EMS), delivered by CDW has all the tools and services you need to successfully manage your mobile environment. EMS from CDW is a hosted solution that grows as quickly as you do, without requiring expensive hardware upgrades to your infrastructure. As a cloud solution, EMS is updated regularly to support the latest devices, operating systems and applications, going beyond the traditional mobile device management platform by including user and group management, as well as application management. By moving on-premises services to the cloud, EMS helps your organization be more productive, better managed and more secure in today's mobile-first, cloud-first world.

Microsoft Intune

Ensures that your devices – whether corporate owned or employee owned – are secured, inventoried and managed

Azure Information Protection

Secures your sensitive data, letting you control how it is accessed and shared among authorized users

Azure Active Directory Premium

Enforces multifactor authentication and enables single sign-on to all of your cloud and on-premises applications

Microsoft Cloud App Security

Powers enterprise-grade visibility, control and protection for your cloud applications

Contact your CDW Account Manager to explore the different licensing tiers and features that will fulfill your organization's needs.

WHITE PAPER: GET THE MOST OUT OF SOFTWARE AS A SERVICE

Despite wide adoption of Software as a Service (SaaS), many organizations may not be fully enjoying its benefits. See how a strategic approach can help you deliver more than just applications at CDW.com/smartersoftware

YOU and CDW

Complete support in and out of the cloud

At CDW, we have nearly two decades of Microsoft product sales and service experience. From Office and Exchange Server to Surface and Windows Server, we've been experts for nearly as long as the products have been on the market.

Our specific expertise frees you from the endless cycle of deployments and updates, helping you concentrate on what you do best. By helping with system integration and providing ongoing support, we allow your staff to focus on other projects.

And with 24/7/365 US based admin support from CDW and a 99.9 percent uptime guarantee, you can be confident that both IT and end users will be able to achieve the full advantages of mobile productivity.

END-TO-END SUPPORT FROM CDW

Services for each stage of the lifecycle

Assess

We'll start with a kickoff consultation and cloud readiness assessment with our solution architects and engineers. This provides insight into your current environment, so we can build a cloud solution to fit your needs and goals.

Design

With the information gathered in our initial assessment, we'll help you design a seamless strategy for the cloud. And with our integration services, we'll make sure your existing infrastructure is equipped to handle your migration and that it will work with your new solution

Deploy

With our concierge migration service, our experts will create a plan for implementation and help you transfer your servers, applications and databases. We'll help the process go quickly and smoothly, and conduct a postmigration assessment to help ensure success.

Manage

If you'd rather focus on other projects, we can also manage or host your cloud solution for you. You can scale the amount of service you want us to handle and enjoy access to our expert engineers and 24/7/365 US based support.

HELP WHEN YOU NEED IT.

U.S.-based administrator phone and email support

Let us help you integrate Enterprise Mobility + Security into your environment.
