

CDW SERVICES:

AZURE MIGRATION FOR WINDOWS AND LINUX SERVERS

BEGIN YOUR AZURE JOURNEY WITH THE RIGHT HELP

Organizations need to reduce their capital expenses and minimize the endless addition of servers, storage and IT infrastructure to support business demands. Microsoft Azure provides a scalable and flexible platform to serve as a data center infrastructure on-demand without investing in hardware or software.

As part of the Azure Migration Services offering, CDW will work with your team to deploy an assessment tool in your environment. We will ensure the tool is configured properly, run the tool, and then help interpret and review the results with you. The results will help your organization understand the costs of moving your on-premises workloads to Azure as well as expected performance. CDW will then assist with the migration of workloads on Azure-supported Windows and Linux servers to Azure with Azure Site Recovery.

This engagement provides expertise in both Azure and a third-party assessment tool, which ensures an accurate accounting of Azure costs and expected performance, allowing you to intelligently move forward with an Azure migration.

WHAT CAN CDW DO FOR ME?

The Azure Migration will include the following:

- Review of your organization's on-premises environment
- High-level understanding of server and networking environment
- Meet with your IT staff to obtain all credentials required for configuration of a third-party assessment tool
- Obtain third-party assessment tool licensing and software
- Installation and configuration of third-party assessment software
- Review the assessment summary and migration plans to understand the projected Azure configurations and costs, and the steps necessary to execute migration
- Review hybrid cloud designs/requirements
- Set up services necessary for migration into Azure
- Work with your organization to relay application changes necessary for migration, and supporting your testing efforts prior to migration
- Testing, piloting and execution of migration plan for supported Windows and Linux servers
- Validate successful migrations

THE BENEFITS

- CDW will provide a custom report with detailed cost information and analysis based on your organization's business and technical requirements.
- Your team will spend time with a CDW consultant to get a thorough understanding of the cost to move into Azure.

WHY CDW?

CDW is uniquely qualified to design IT solutions that remove complexity and unnecessary costs from your organization. Our experts become part of your team, providing the support you need, when and where you need it.

We can help you navigate Microsoft's robust array of solution offerings, including Azure. CDW is an end-to-end provider of cloud applications, solutions and services in public, private and hybrid cloud environments. Based on your business demands, we can help you plan, deliver and manage a flexible cloud solution tailored to your needs. We offer best-of-breed providers, risk mitigation strategies and dedicated, personalized expertise to deliver economic and operational benefits.

We get Microsoft Azure. And we can share our knowledge with you, so your organization can spend less time managing software and more time putting it to work.
