Redefining Security Orchestration and Automation

Cortex™ XSOAR is a comprehensive security orchestration, automation and response (SOAR) platform that unifies case management, automation, real-time collaboration, and threat intelligence management to serve security teams across the incident lifecycle.

The New Pillars of a SOAR Platform

**Security Orchestration**
- Respond to incidents with speed and scale
- Hundreds of integrations
- Thousands of automatable actions
- Visual playbook editor

**Case Management**
- Ingest, search, and query ALL security alerts
- Custom incident layouts
- Auto-documentation
- Dashboards and reports

**Collaboration and Learning**
- Improve investigation quality by working together
- Virtual war room
- Investigation canvas
- Machine learning

**Threat Intel Management**
- Parse, manage, and act on threat intelligence
- Threat feed aggregation
- Granular indicator view
- Intel sharing and response

**Select Customers**
- 25% of the Fortune 500
- Top worldwide online payment system
- Fortune 50 healthcare organization
- Fortune 100 athletic wear retailer
- Online streaming and entertainment giant

**SOAR Ecosystem**
- 370+ integrations
- Open, extensible platform
- Community 13,000+ members (largest IR community in the industry)
- Partners 100% Channel-friendly

- MSSP and cloud ready

How Cortex XSOAR Works

Cortex XSOAR ingests aggregated alerts and indicators of compromise (IOCs) from detection sources—such as security information and event management (SIEM) solutions, network security tools, threat intelligence feeds, and mailboxes—before executing automatable, process-driven playbooks to enrich and respond to these incidents. These playbooks coordinate across technologies, security teams, and external users for centralized data visibility and action.

How Cortex XSOAR Helps

- **Improve Investigation Quality**
  Use a collaborative workspace, machine learning and cross-correlations

- **Automate Repeatable Steps**
  Automate actions to standardize and scale incident response

- **Unify Security Functions**
  Gather intelligence from multiple products on a single console
