Symantec Data Loss Prevention – Now with CASB

Extend DLP to 60+ Cloud Apps | Leverage Your Existing DLP Policies and Workflows | Gain Full CASB Security Functionality

Uncover shadow data lurking in the cloud with the industry’s first integrated cloud security solution that combines the best-in-class data loss prevention (DLP) and cloud access security broker (CASB) technologies from Symantec.

Confidently adopt cloud apps with an integrated cloud security solution from Symantec, and solve these challenges of cloud app adoption.

Accidental and malicious data loss | New targets for hackers & malware | Stricter regulatory requirements | Increased complexity
Extend Symantec DLP to the Cloud

Discover Sensitive Data in Cloud Apps
Direct visibility and control over all types of content in more than sixty cloud apps—including Office 365, Box, Dropbox, Google Apps, or Salesforce

Reuse DLP Policies and Workflows
Leverage existing DLP policies and workflows for cloud apps without having to rewrite finely tuned rule sets

Optimize Cloud DLP Performance
Run DLP detection as a service rather than on-premises to gain operational efficiency

Manage DLP Everywhere from One Console
Author DLP policies and remediation workflows for cloud apps, endpoints, networks, and data centers—all from one unified management console

Gain Additional CASB Security with CloudSOC™

Safeguard against risks of data loss and threats targeting cloud accounts with visibility and control directly over the use of cloud apps.

Discover Shadow IT
Identify and audit cloud services in use and analyze application risk levels

Detect and Mitigate Risky User Activity
Leverage user behavior analytics to control potentially malicious actions and threats

Protect Against Risk of Exposure
Gain granular visibility and control over user access and transactions with data in cloud apps

Investigate Cloud Incidents
Easily monitor historic cloud events leveraging granular log data through an intuitive user interface

Free Shadow Data Risk Assessment

Get a look into one of your sanctioned cloud apps and see if you have...

- Sensitive data in the cloud
- Data accessible by external entities or the general public
- Malware
- High risk users

DLP with CASB requires the following products

- Symantec Data Loss Prevention 14.5 Enforce Management Server
- Symantec Data Loss Prevention Cloud Service Connector
- Symantec CloudSOC Securlet
- Symantec CloudSOC CASB Gateway
