

3 Things You Need to Know About Prioritizing Vulnerabilities

Last year, 16,500 new vulnerabilities were disclosed – a marked spike from 15,038 vulnerabilities in 2017. On top of that, the majority of these vulnerabilities were categorized as high or critical based on the industry-standard Common Vulnerability Scoring System (CVSS).

With the number of vulnerabilities on the rise, and their severity increasing, how can you identify the biggest cyber threats to your business – and know what to fix first?

Download the “3 Things You Need to Know About Prioritizing Vulnerabilities” ebook now to:

Key highlights from the study include:

- Discover the 3 critical steps to building an effective vulnerability remediation plan
- Explore the pitfalls of popular prioritization approaches
- Learn next steps you can take today to dramatically reduce the list of vulnerabilities you need to remediate

If you're looking for answers to questions like “Where should we prioritize based on risk?” and “Which vulnerabilities are likeliest to be exploited?” this quick read is an excellent way to get started. Download the free ebook now.

ABOUT TENABLE

Tenable®, Inc. is the Cyber Exposure company. Over 27,000 organizations around the globe rely on Tenable to understand and reduce cyber risk. As the creator of Nessus®, Tenable extended its expertise in vulnerabilities to deliver the world's first platform to see and secure any digital asset on any computing platform. Tenable customers include more than 50 percent of the Fortune 500, more than 25 percent of the Global 2000 and large government agencies. Learn more at www.tenable.com.

And 2018's trends are even more sobering: According to the National Vulnerability Database (NVD), 16,500 new vulnerabilities were disclosed.
