

A TURN-KEY SOLUTION

VARIDESK® offers CDW customers complimentary space planning and project services. Our team will partner with you on any size project from inception to completion.

HERE'S HOW:

1. Ask your CDW account manager to set up a call with the VARIDESK team to talk about your project goals, space considerations, and product choices.
2. Answer a brief questionnaire and provide VARIDESK with any CAD files, floor plans, photos, or notes that may be helpful in creating your plan.
3. Receive your complete 2D or 3D rendering within 3-4 days.

- Our space planning team is staffed with trained architects and interior designers, who work within ADA compliance to maximize your workspace and scale for your growth.
- We can even recommend power requirements, lighting designs, and color palettes to create an effective and cohesive design.
- We also offer project management services and can help set up your space with our premium installation service.
