Enterprise data sources are vast, but regardless of source or location, all data needs protection. It must be backed up, but more importantly, it must be recoverable at any time, at any scale, as quickly as possible. Getting modern, infrastructure-agnostic and highly-scalable data protection for any workload in the enterprise is only possible with Veritas.

The Enterprise Data Services Platform offers solutions in the three areas that matter most: availability, protection, and insights. It’s the most versatile and extensible platform available to enterprises and represents the perfect IT foundation. It’s built on a NetBackup 8.2 core and supports 500+ data sources, 150+ storage targets and 60+ clouds—and it can be deployed in any form factor today.

**THREE IMPACTING TRENDS**

- 175 zettabytes of data by 2025
- $33B Amount the ransomware industry will be by 2025
- 75% of organizations will have deployed hybrid cloud or multi-cloud by 2025

**THREE DATA PROTECTION CHALLENGES**

- THOUSANDS OF PLATFORMS AND WORKLOADS: OPERATING SYSTEMS, VIRTUAL, DATABASES, SaaS, BIG DATA, CLOUD
- HUNDREDS OF STORAGE TARGETS: BACKUP APPLIANCES, DEDUPE APPLIANCES, HARDWARE SNAPSHOTS, FLASH BLADES, CLOUD, TAPE
- MULTITUDES OF COMPLIANCE REGULATIONS: GDPR, HIPAA, PCI DSS, CCPA, FTCA, FACTA, FINRA, MIFID III

**THE SOLUTION - VERITAS PROTECTION**

**PROTECTION**

Three Data Protection Challenges

- **NetBackup**
  - Keep your business-critical data secure and compliant no matter where it lives, while eliminating the cost and complexity of point products.
  - Ensure rapid recovery of your data while scaling to any size workload, regardless of deployment form factor - software, appliances, containerized, SaaS.
  - Learn more ›

- **Cloud Data Protection**
  - Securely scale your data protection strategy to the cloud and choose from over 60+ fully tested and certified cloud connections, including AWS S3, Microsoft® Azure, Google Cloud Platform, Oracle Database Server, IBM Bluestack, Office and BaseBlue.
  - Learn more ›

- **Ransomware**
  - Protect your data with a ransomware solution that locks or encrypts your data. Ensure that data is always recoverable to you even if you need to shut down.
  - Learn more ›

- **Modern Workloads Protection**
  - Get modern protection for popular data workloads, including hybrid and multi-cloud environments, on-premises and SaaS.
  - Learn more ›

**VIRTUAL DATA PROTECTION**

- Automated protection and granular recovery for VMware, Microsoft Hyper-V, Nutanix AHV, Bare Metal Virtualization and OpenStack.
  - Learn more ›

**DISASTER RECOVERY**

- Resiliency isn’t just about backup and replication. Veritas data protection to automated and SLA driven recovery that spans to the option for active business services.
  - Learn more ›

**LONG TERM RETENTION**

- Reduce risk and stay compliant with end-to-end, last-effective long term retention in software or appliance form factors.
  - Learn more ›

**CLOUD DATA PROTECTION**

- Seamlessly scale your data protection strategy to the cloud and choose from over 60+ fully tested and certified cloud connections, including AWS S3, Microsoft® Azure, Google Cloud Platform, Oracle Database Server, IBM Bluestack, Office and BaseBlue.
  - Learn more ›

**RANSOMWARE**

- Protect your data from a ransomware attack that locks or encrypts your data. Ensure that data is always recoverable so you never need to pay a ransom.
  - Learn more ›

**MODERN WORKLOADS PROTECTION**

- Get modern protection for popular data workloads, including hybrid and multi-cloud environments, on-premises and SaaS.
