

## New Veritas Learning Lab Course

### Backup Exec 21 Administration!

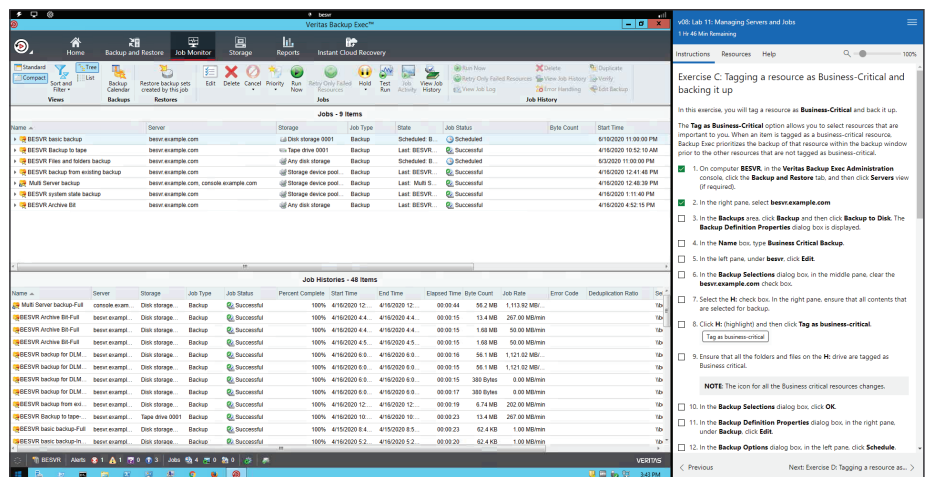

#### NEW LOW-COST VERITAS LEARNING LAB COURSE FOR BACKUP EXEC

Learn the ropes of Backup Exec as well as best practices in this new education course offering!

The Veritas Learning Lab is an environment where professionals engage in self-paced training for Veritas solutions such as NetBackup™, InfoScale™ and Backup Exec™. These students have access to real-world, hands-on labs that include written step-by-step instructions for many different modules such as installation and configuration. Developed by Veritas experts, these are the same lab activities that would be delivered in formal training classes.

Students can also use the environment as a sandbox to test and “break” configurations without worrying about impacting production systems. They can also access the labs from anywhere with an Internet connection, making it possible to learn from the comfort of home.

So what’s new? Our platform has had some enhancements, and Veritas has created a Learning Lab course specifically for small-to-midmarket customers using or purchasing Backup Exec 21.

#### What's included?

- Self-paced, step-by-step course with hands-on labs and instructions.
- Sandbox capabilities to test new configurations.
- Access to the learning platform for 6 months.

For more details about the course, please visit:
